

Nikola Deletić

Medior Android Engineer

About Me

Android engineer with strong Kotlin and Java skills and experience in MVVM, MVI, Coroutines, Flows and Jetpack components. Proficient in both XML layouts and Jetpack Compose for building clean, responsive UIs. Led end-to-end projects using DI, Firebase and Room. Very team-spirited and always ready to learn, improve, challenge myself, and share knowledge with others.

Experience

Tcom D.O.O.

May 2024 - present

- Designed and developed advanced applications for the Android OS, ensuring high performance, quality, and responsiveness.
- Debugged and optimised software, improving application stability and user experience.
- Collaborated with cross-functional teams to define, design, and deliver new features for key clients.
- Actively contributed to company-wide technical decisions, including introducing **Jetpack Compose** as the primary UI toolkit, setting new standards for future Android projects.
- Participated in high-level meetings with major clients, providing technical insights and representing the Android team in strategic discussions.

Projects

NFC Lock

August 2024

An application for the field technicians of the Electrodistribution of Serbia, enabling data collection about substations. Allows full offline support with Room database and data synchronisation with backend and web app when online. Integrated NFC technology for lock/unlock functionality.

NFC TS

June 2024

Tailored Android solution developed directly for the technicians of the Electrodistribution of Serbia. Provides work orders with task checklists, supports offline data handling, and uses NFC-based smart locks instead of traditional keys.

Hand Seals

June 2020

Personal project with **30,000+ global downloads** on Google Play. Built out of passion for the anime community, combining creative features with technical excellence.
